1. The following is an examiner's statement of reasons for allowance: the prior art does not adequately disclose a power line communication data transfer method comprising providing plural PLC carriers, and selecting for each distinct carrier an order of modulation based on channel quality data for the carrier and node configuration data, or for obtaining a channel quality or node configuration data for each carrier, computing based on the channel quality of node configuration data a PLC transmission quality estimate for each carrier, finding an order of modulation for each carrier by comparing the transmission quality estimate with PLC system thresholds, the thresholds representing the quantity of data bits that can be packed onto a PLC carrier without substantially affecting data reproduction quality following signal transmission, and assigning an order of modulation to each carrier based on the results of the comparison.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent A. Swarthout whose telephone number is 571-272-2979. The examiner can normally be reached on M-F from 6:30 to 4:00.
